

Kolloquium der Institute für Anorganische und Organische Chemie

Wintersemester 2024/25

Freitag(!), 18.10.2024, 15:15 Uhr, HR 30.1

Prof. Dr. Shoubhik Das (Universität Bayreuth)

Selectivity-driven sustainability by using photocatalysis as a key tool

Montag, 11.11.2024, 17:15 Uhr, HR 30.1

Prof. Dr. Frank Breher (KIT)

News from Group 13: Stimuli-responsive Lewis Acids and Ambiphilic Metallacycles

Montag, 02.12.2024, 17:15 Uhr, HR 30.1

Prof. Dr. Malte Brasholz (Universität Rostock)

New radical-induced and photooxidative syntheses of *N*-heterocycles and alkaloids

Montag, 16.12.2024, 17:15 Uhr, HR 30.1

Prof. Dr. Detlev Belder (Universität Leipzig)

Integrated Chemical Circuits - The core of tomorrow's chemical discovery bots?

Montag, 06.01.2025, 17:15 Uhr, HR 30.1

Prof. Dr. Yann Trolez, École nationale supérieure de chimie de Rennes

Chasing cyanopolynes on Earth - From interstellar chemistry to synthetic methodology

Montag, 13.01.2025, 17:15 Uhr, HR 30.1

Prof. Dr. Till Opatz (Johannes Gutenberg-Universität Mainz)

Wood, Light and Electricity – Three Flavors of Synthetic Chemistry

Prof. Dr. Marc Walter, Prof. Dr. Christopher Teskey
